Bug Fixes & Enhancements:

- Reference the [UPlan Enhancements](#) page for a complete list of enhancements relevant to the last fiscal year.

Known Issues:

- **Saved Smart View Workbook Cannot Connect to the Revenue and Expense – Level C Form:** If you try to connect a saved Smart View workbook to the Revenue and Expense – Level C form, you will encounter an error. The reason is when we modified the Task List to include the Forecast Approved Revenue and Expense Level C form, the Task List automatically changed a different number next to the Revenue and Expense Level C form's name. As a result, this changes the path of where the form was originally saved.

The workaround is to either:

- Reload each worksheet from the Smart View panel on the right by connecting to 1.1 Revenue and Expense – Level C or 1.2 Fcst Apprd – Rev & Exp Level C Form > Change POV to match the DFP in the worksheet name > Refresh. (As a reminder, this would erase any saved formulas in your worksheet unless you copy/pasted them out and back after refreshing the form).
 - Recreate all workbooks/worksheets from scratch, copy/pasting any formulas you may have saved.
- Reference the [UPlan Known Issues](#) page on our website for a complete list of unresolved issues. As known issues are resolved, they will be announced under “Bug Fixes & Enhancements”.
