Bug Fixes & Enhancements:

- **RESOLVED – FY18 Plan Final Data in MyReports:** The FY18 Plan Final data has been re-exported to MyReports on September 11 to correct a signage issue for data originating from PLUS.
- **RESOLVED – Salary and Benefit accounts not displaying correctly in General Planning:** The employee module was recalculating “Initial Base&Neg Salary” for some employees resulting in some planners seeing incorrect salary and benefit numbers in General Planning. The issue is now resolved.
- **RESOLVED – Incorrect Plan Final Data:** Due to a technical issue, FY18 and/or FY19 Plan Working was not accurately copied to Plan Approved or Final for some DeptIDs. The issue is now resolved.
- **RESOLVED – Employee Accounts Not Actualizing:** The “Addtl Salary” and “Fac Bon&Incv (BYZ)” accounts in the Employee Planning Salary & Benefits Level forms were not actualizing every month. The issue resulted in old forecast/plan data, not actuals, showing in actualized months. These accounts are now included in the monthly actuals load.
