Bug Fixes & Enhancements:

- **VAC DOS code now entirely mapped to Benefits in Employee Planning:** The VAC DOS code for payroll in Employee Planning no longer mimics PPS (MyReports DPE) where VAC is mapped to both Salary and Benefits accounts. Now, Employee Planning matches General Planning which mimics the PeopleSoft GL where VAC is mapped entirely to Benefits. This resolves inconsistencies between the salary and benefits amounts in Employee Planning versus General Planning so that planners are not overstating benefits and understating salary when using Employee Planning.

- **RESOLVED – Employee FP Feed to UPlan showing data for April 2018-June 2018:** Payroll has updated the internal payroll processing calendar up to June 2018. There is now Faculty Portfolio Employee data to copy into UPlan between April 2018-June 2018.
